

## T-System Hires CFO

*Steve DeCosta will partner with executive team to financially lead company in organic and inorganic growth*

**DALLAS – May 11, 2018 – [T-System, Inc.](#)** has hired Steve DeCosta as Chief Financial Officer (CFO). DeCosta will partner with the executive team in the day-to-day financial operations and in developing the financial and operating strategy for the Company, helping its two businesses function optimally as the company pursues its aggressive growth strategy.

“Steve brings T-System a wealth of experience and knowledge in all areas of finance and accounting, along with focused, financial discipline needed to help steer our growth,” said Tim Swango, Executive Vice President and Chief Operating Officer for T-System. “His background in publicly traded and equity-backed companies provides expertise in helping businesses grow both organically and inorganically. We believe that he will help to create value for T-System as we continue to look to further extend our industry leadership by capitalizing on opportunities within the clinical documentation and revenue cycle management areas of our industry.”

DeCosta joins T-System from Research Now, digital data collection company, where he oversaw finance, accounting, tax and treasury. Prior to that, he spent more than a decade in financial leadership positions with THQ Inc. and Advanced Structures Inc. He began his career in public accounting as a licensed CPA.

### **About T-System**

T-System is a healthcare IT company that advances care delivery and financial outcomes for episodic care. Specializing in emergency department documentation since 1996, T-System has since expanded its focus to include the development of [innovative solutions](#) for the rapidly expanding episode-based care market, including hospital-based emergency departments (EDs), freestanding emergency centers and urgent care centers. Through clinically-driven services and documentation solutions as well as charge capture and coding solutions, T-System solves clinical, financial and operational challenges for our clients. About 40 percent of the nation’s hospital-based EDs, freestanding emergency centers and urgent care centers use T-System to improve the clinical encounter, including the documentation of the patient visit as well as the downstream outcomes related to that event.
